

# Summary of Reportable Communicable Disease & Prevention Responsibilities by Bureau Staff

NR = Not Reportable; 📞 = DO NOT PUT IN VOICE MAIL...must talk to a live person

Updated 5/19/17 (tm)

## **DREAM Analytic Epi**

**Keegan McCaffrey (89182)**

**Bkup: 1) Gregg (86289), 2) Wei (86261)**

- Meningitis (aseptic, viral, and bacterial)
- Streptococcal-Group A, B, C, & G
- Toxic-shock syndrome, staphylococcal and streptococcal (TSS and STSS)

## **DREAM Analytic Epi**

**Zach Baucom (86268)**

**Bkup: 1) Bree (86300), 2) Dallin (86333)**

- Coccidioidomycosis
- Legionellosis

## **Enteric Diseases Investigator (EDI) epidemiologist**

**Laine McCullough (86182)**

**Bkup: 1) Kenny (86205), 2) Cindy (86692)**

- Amebiasis - NR
- Cryptosporidiosis
- Cyclosporiasis
- *Shiga toxin-producing E. coli (STEC)*
- Giardiasis
- Hemolytic-uremic syndrome (HUS)
- Trichinellosis
- **Vibriosis: cholera (*Vibrio cholerae*) 📞**
- Vibriosis: non-cholera *Vibrio* species

## **Foodborne diseases epidemiologist**

**Cindy Burnett (86692)**

**Bkup: 1) Kenny (86205), 2) Laine (86182)**

- **Botulism 📞**
- Salmonella
- **Typhoid fever 📞**
- Yersiniosis-NR
- *Norovirus (outbreaks)* **Jerry Nelson (86248)**

## **FoodCORE epidemiologist/Lead EDI**

**Kenny Davis (86205)**

**Bkup: 1) Cindy (86692), 2) Laine (86182),**

- Campylobacter
- Listeria
- **Middle-East Respiratory Syndrome (MERS) 📞**
- **Severe Acute Respiratory Syndrome (SARS) 📞**
- Shigella

## **Hansen's Disease epidemiologist**

**Surveillance: Jerry Carlisle (86222)**

**Clinical: Larry Niler (89906)**

**Bkup: Amelia Self (86221)**

- Hansen's Disease (leprosy)

*Jerry and Larry are also back-ups for each other*

## **Health Educator**

**Becky Ward (86682)**

**Bkup: Wei Hou (86261)**

- Bed bugs\* - NR
- Fifth disease – NR
- Hand, foot, and mouth disease - NR
- Head lice\* - NR
- Histoplasmosis - NR
- Mononucleosis – NR
- Reye syndrome – NR
- Toxoplasmosis – NR
- Typhus – NR

## **HIV surveillance epidemiologist**

**Matt Mietchen (86207)**

**Bkup: 1) Luke Edvalson (89102), 2) Ahmer Afroz (86287)**

## **HIV (AIDS)**

**Prevention questions: Ahmer Afroz (86287)**

**Heather Bush (86194), Erin Fratto (86701)**

## **Influenza surveillance epidemiologist**

**Gregg Reed (86289)**

**Backup: 1) Bree (86300), 2) Jeff (89141)**

- Acute Flaccid Myelitis (AFM)
- Guillain-Barre' Syndrome
- Influenza activity – NR
- **Influenza - animal and human (novel) 📞**
- Influenza - associated hospitalizations
- Influenza - associated pediatric deaths
- **Poliomyelitis 📞**

## **Early Hearing Detection & Intervention**

**Stephanie McVicar (801-584-8215)**

**Backup: Jill Boettger (801-584-8215)**

- Cytomegalovirus

\*Callers looking for **head lice** or **bed bugs** information may be referred to the websites:

<http://health.utah.gov/epi/diseases/Lice> or <http://health.utah.gov/epi/diseases/bedbugs>

Callers with additional questions regarding rats, cockroaches, or other sanitation issues should be referred to the caller's

Local Health Department. All other disease calls may go to any available epidemiologist, Melissa (86810), Angela

(86226), or Becky (86682). **You may reach the on-call epi by calling 888-EPI-UTAH (888-374-8824)**

# Summary of Reportable Communicable Disease & Prevention Responsibilities by Bureau Staff

NR = Not Reportable; 📞 = DO NOT PUT IN VOICE MAIL...must talk to a live person

Updated 5/19/17 (tm)

## STD surveillance epidemiologist

Scott White (86288)

Bkup: 1) Matt (86207), 2) Megan (86223),  
3) Erin (86701)

Prevention questions: Megan Evans (86223) or  
Erin Fratto (86701)

- Chancroid – Scott (86288), 1) Megan (86223),  
2) Erin (86701)
- Chlamydia
- Gonorrhoea
- Syphilis (*Scott primary, Matt back-up*)

## Syringe exchange

Heather (86194), Erin (86701), Ahmer (86287)

## Tuberculosis epidemiologists

Surveillance: Jerry Carlisle (86222)

Clinical and prevention questions: Larry Niler  
(89906)

Bkup: 1) Jerry (86222), 2) Chelsey (86834), 3)  
Amelia (86221)

Hospital admission requests: 1) Larry (89906),  
2) Amelia (86221)

- Mycobacteria other than tuberculosis
- Tuberculosis 📞

*\*Jerry and Larry are also back-ups for each other*

## Vaccine-preventable diseases epidemiologist

Jeff Eason (89141)

Bkup: 1) Gregg (86289), 2) Bree (86300)

Prevention questions (hepatitis):

Heather Bush (86194)

- |   |                           |
|---|---------------------------|
| • Chickenpox  | • Meningococcal disease 📞 |
| • Diphtheria 📞  | • Mumps                   |
| • <i>H. influenzae</i> 📞  | • Pertussis               |
| • Hepatitis A 📞   | • Rubella 📞               |
| • Hepatitis B (acute, chronic,<br>and perinatal), C, D, E,<br>and other | • <i>S. pneumoniae</i>    |
| • Measles (rubeola) 📞   | • Tetanus                 |

## Vector-borne/zoonotic diseases epidemiologist

Dallin Peterson (86333)

Bkup: 1) Jeff (89141), 2) Gregg (86289)

- |   |                                |
|---|--------------------------------|
| • Anaplasmosis                                      | • Malaria                      |
| • Arboviral infection<br>(including SLE, EEE, etc.) | • Psittacosis                  |
| • Babesiosis  | • Q fever (Coxiella infection) |
| • Brucellosis                                       | • Rabies 📞                     |
| • Colorado tick fever                               | • Raccoon Roundworm – NR       |
| • Dengue fever                                      | • Relapsing fever              |
| • Echinococcosis - NR                               | • Rocky Mountain spotted fever |
| • Ehrlichiosis                                      | • West Nile virus (WNV)        |
| • Encephalitides                                    | • Yellow fever 📞               |
| • Hantavirus  | • Zika Virus 📞                 |
| • Leptospirosis                                     |                                |
| • Lyme disease                                      |                                |

## Preparedness Analytic Epi

Bree Barbeau (86300)

Bkup: 1) Dallin (86333), 2) Zach (86268)

- Anthrax 📞
- Creutzfeldt-Jakob Disease 📞
- Ebola/viral hemorrhagic fevers/emerging infections 📞
- Plague 📞
- Smallpox 📞
- Tularemia 📞
- Vaccinia/adverse events resulting from smallpox vaccination

## HAI Analytic Epi

Randon Gruninger (86106) / Susan Mottice - HAI  
(86172)

Bkup: 1) Lindsay (86200), 2) Karen (86662)

- *Acinetobacter* species, Carbapenem resistant
- *Clostridium difficile* (*C. difficile*, or “*C. diff*”) – NR
- *E. coli*, Carbapenem-resistant (non STEC)
- *Klebsiella* species, Carbapenem resistant
- Methicillin-resistant *S. aureus* (MRSA) – NR
- Vancomycin-resistant enterococci (VRE) – NR
- Vancomycin-resistant, or vancomycin-resistant, intermediate *S. aureus* (VRSA or VISA)
